INSTRUCTIONS FOR PROVIDING ANSWERS

The following instructions should be strictly adhered to, as computer will mark your answers.

1. Use **only** a **Ballpoint Pen (Blue or Black)**.
2. Select the letter(s) (choices) you choose as the **correct response(s)** and **shade the circle completely** as shown in example (i) below. Note that example (ii) to (v) are classified as incorrect (wrong). Note that it is essential to shade the centre of the circle.

(i) **Correct** (Fully shaded)

(ii) **Wrong** (Partially shaded)

(iii) **Wrong** (Center not shaded)

(iv) **Wrong** (Cross rejected)

(v) **Wrong** (Tick rejected)

3. The letter (choice) you select as correct response should be shaded fully as in example (i). Any response, which is **shaded partially, can be interpreted incorrectly** as marked or unmarked by the computer. It is recommended that you **initially** mark your options by **underlining** your options **outside** the relevant **circle** (lightly) as indicated below and **later shade** the circle **fully** as in example (i). The computer will ignore any mark made outside the relevant circle and hence you need not erase these underline marks.

- Do not use tippex. **Avoid** leaving **ink marks inside** the circle of a **non-response**. If erased do not write the letter (choice) for a non-response.
- No** rough work whatsoever should be done on this answer sheet. Use a separate sheet of paper for rough work.
- Do not** fold, tear or crush any part of the answer sheet.
- Check the number of questions in the question paper and mark only up to the given number.
- Check that the index number in your admission card and the desk is the same. **Write** your 7 digit **index number** clearly in the given box and **mark** the index number accurately by **shading** the appropriate circles as shown in the example.
